

Nurse Clinician-Research

In this position, you will manage and coordinate all facets of assigned clinical research protocols from IRB preparation thru query and data seal insuring protocol and regulatory compliance. Will act as a liaison between patient, physician and study sponsor. Will work within the Center for Thoracic Disease as part of a team of clinical research professionals at St. Joseph's Hospital and Medical Center. This position offers a Mon-Fri work schedule and continued growth.

The Center for Thoracic Disease specializes in evaluating, diagnosing and treating individuals with diseases of the lung and chest. The services offered represent the largest and most advanced programs of their kind in the Southwest.

Requires a BSN degree or equivalent combination of education and experience. Master's preferred and 3 years experience in a clinical research environment. Arizona RN License or eligibility is necessary. Requires excellent critical thinking skills and the ability to function independently with minimal supervision. Working knowledge of research methodologies is a must.

We offer competitive compensation and a generous benefits package that includes comprehensive medical and dental plans, matched 403b retirement and pension plans, relocation assistance (up to \$9,000), and much more. To apply, visit www.stjosephs-phx.org and reference **Job ID# 1100001289**.
